

Govind Nair

 g4nair@uwaterloo.ca  (647) 676-2835  Personal Portfolio  GitHub  LinkedIn

Skills

Languages: Python, C++, Java, C, JavaScript, TypeScript, HTML/CSS

Technologies/Frameworks: Angular.js, React.js, Node.js, Express.js, GraphQL, Bootstrap, Git, Tensorflow, Keras, OpenCV, Numpy, Pandas

Experience

SS&C Technologies Holdings

Toronto, ON

Full-Stack Developer

Sep 2021–Dec 2021

- Part of an **Agile Angular** development team for an Automated Distribution adjustment Web-Application allowing employees to easily adjust trade prices
- Utilized **Angular** to build a dynamically generating table component when data is provided
- Used Apollo-Angular to send **GraphQL** mutations to a Spring microservice and displayed the correctly formatted data using the table component.
- Implemented **Schemas** and **Resolvers** for a GraphQL middle tier to interface multiple microservices with the Angular front-end
- Part of a **Agile Java** development team for a Trading calculator API allowing clients to place hypothetical trades
- Added and refactored unit tests using **JUnit** and **Mockito** to increase total code coverage to greater than 80%
- Configured the auto generation of the **Swagger** Document for a Spring microservice using the **Docket** class and **Spring**

Trubotics

Markham, ON

Team Captain

Sep 2019–Jun 2020

- Oversaw a team of **5** students and assigned appropriate positions according to each one's skills
- Collaborated with peers to identify flaws in multiple designs and to improve prototypes

Projects

Recipe.io

Jan 2021

- Coded a full-stack web application that finds recipes based on ingredients a user inputted using the Spoonacular **API**
- Worked primarily on the back-end using **Node.js** and **Express.js**
- Project was created for Hack The North 2020++ in a team of 4.

Languages/Technologies: React.js, Node.js, Express.js, Bootstrap

Flappy Bird AI

Jul 2020

- Used the NEAT Algorithm (NeuroEvolution of Augmenting Topologies) to train an agent to play a clone of the game Flappy Bird.
- Programmed both the game environment and AI using **Python**.

Languages/Technologies: Python, Pygame, NEAT

Number Predictor

Jun 2020

- Using Tensorflow and the MNIST digit data, developed a program that classifies a users handwritten digit using a Convolutional Neural Network.

Languages/Technologies: Python, Tensorflow, Tkinter, OpenCV

Education

University of Waterloo

Waterloo, ON

Candidate for Bachelor of Computer Science (BCS) 3.8 GPA, 87.8% average

2020–2025
